## Code

```
#include <stdint.h>
#define u8 uint8_t

int main() {
   u8 a[8] = {6, 5, 3, 7, 0, 1, 4, 2};
   u8 *p = &a[0];
   u8 *q = &a[2];
   u8 *r = &a[3];
   // <<< Evaluate values at here!
}</pre>
```

## Q. Fill answers in digits (or? for undefined behavior)

Note: \_ is a place holder So the cell on row "a[\_]" and col "0" should be filled with the value of "a[0]"  $_{/ \frac{pq}{er}}$ ?
